

North Shore Schools

Discovering Your Dreams

Working Hard to Protect our Community from Unprecedented Challenges

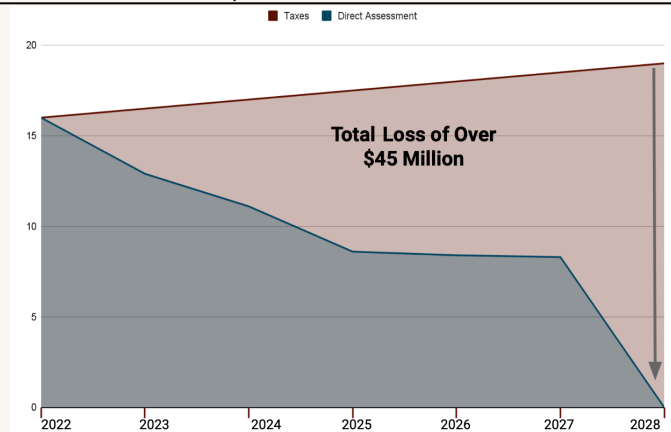

OUR RESIDENTS

- The percentage of property tax paid by homeowners has increased by **30% since 2001 (9% since 2022)**.
- The North Shore community has many fixed-income, working class and median-income families.
- Despite massive school budget cuts, many residents are **struggling** to keep up with an exponential tax shift since the 2022 LIPA/Nassau County agreement.
- **Relief for taxpayers for school and community taxes is desperately needed, beyond school budget cuts.**

OUR CHILDREN

- The North Shore Schools will lose over **\$45 Million in revenue by 2028** due to the 2022 LIPA/Nassau County agreement.
- The District **cut \$3 Million** in programs last year and will need to **cut another \$4 Million** this year. **\$7 Million = 56 Teachers.**
- Further cuts will jeopardize basic programs for all students.
- **Increased state aid or access to mitigation funds is desperately needed for our children.**

OUR ENVIRONMENT

- There is a community desire to reclaim and use lost waterfront property as power plants shutdown.
- Hempstead Harbor needs consistent monitoring to protect wildlife and water quality.
- **Replacing existing plants with new green energy infrastructure at the Glenwood Landing site can create healthier land, air, and water for our residents and children, and generate new revenue.**
